*\*PLEASE NOTE: All fees are subject to review and change. Please contact the Authority at (732) 431-8185 prior to remittance.*

**EFFECTIVE: JANUARY 1, 2024**

- 3.13 “Equivalent Dwelling Unit” shall mean the equivalent wastewater flow from one three bedroom single family dwelling unit and shall be applied to residential, industrial, commercial and other users at an average rate of 300 gallons per day.
- 3.13.A. “Equivalent Dwelling Unit (Non-Residential Calculation)” The Authority’s Engineer shall determine the equivalent wastewater flow from the proposed non-residential use by reference to the NJDEP flow standards published within N.J.A.C. 7:14A-23.3 where available; or based upon comparable use flows as determined by the Authority’s Engineer using the best available information. The amount of flow determined in gallons per day shall be divided by 300 to determine the number of Equivalent Dwelling Units of sewage to be used to calculate connection fees.
- 3.13.B. “Equivalent Dwelling Unit (Residential Calculation)” shall be based upon the number of bedrooms proposed for each residential dwelling. In computing the equivalent wastewater flow from a proposed residential use to be used to calculate connection fees, the following adjustments shall be made where 1 EDU as defined above equates to 300 gallons per day:
1. Residential dwellings with one bedroom shall be equivalent to 0.50 EDU
  2. Residential dwellings with two bedrooms shall be equivalent to 0.75 EDU
  3. Residential dwellings with three or four bedrooms shall be equivalent to 1.0 EDU
  4. Residential dwellings with more than four bedrooms shall be equivalent to 1.25 EDU

Where a residential dwelling contains more than three bathrooms, and/or more than one kitchen area, and/or more than one laundry area, or provides for some other use on the residential property which will cause additional sewerage flow; the Authority’s Engineer shall determine the reasonable amount of additional equivalent sewer usage to be added to the EDU’s determined above.
